Sales Performance Dashboard

- **Project Overview:-**

- The Sales Performance Dashboard is an interactive Excel-based project designed to analyze and visualize regional sales data in a structured and meaningful way. The primary goal of this project is to transform raw sales data into clear insights using data analysis and visualization techniques.
- This dashboard enables users to compare sales performance across different regions, monitor total sales figures, and apply dynamic filters using slicers for better decision-making. By utilizing Pivot Tables and Pivot Charts, the data is automatically summarized and updated based on selected filters.
- The project demonstrates practical skills in data organization, analysis, visualization, and dashboard design using Microsoft Excel.

- **Tools & Techniques Used:-**

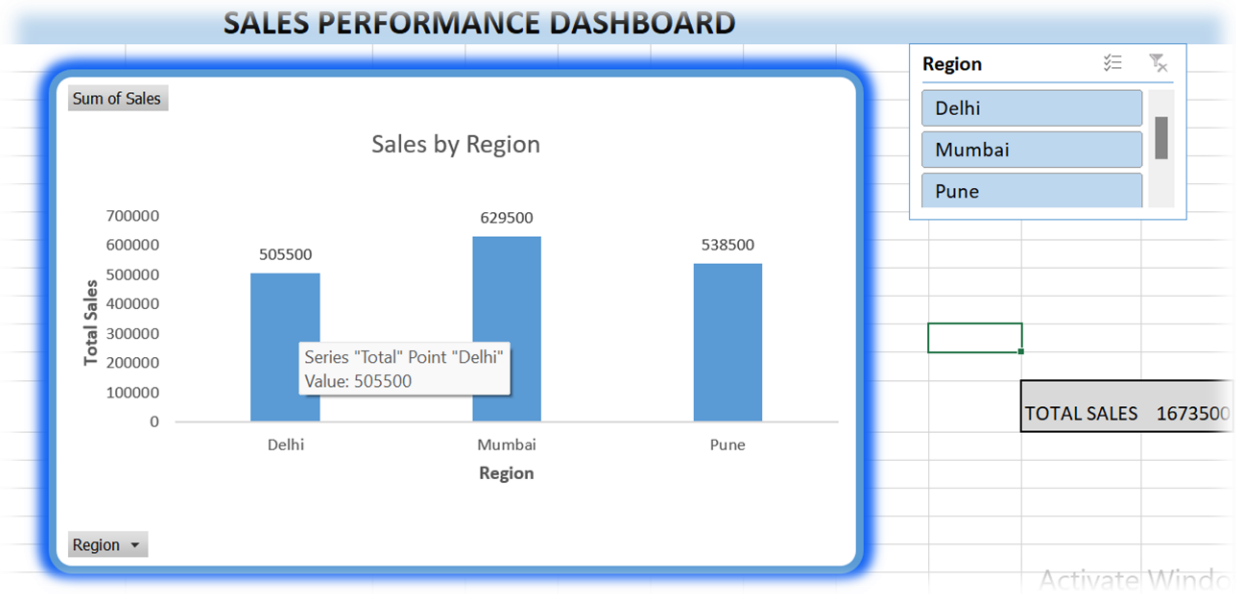
- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Slicers
- KPI Metrics
- Data Labels & Formatting

- **Key Features**

- Region-wise sales comparison
- Interactive filtering using slicers
- Automated total sales calculation
- Clean and professional dashboard layout

Sales Performance Dashboard

- **Dashboard Preview & Explanation**



The dashboard presents a visual representation of regional sales performance. The bar chart compares sales across different regions, while the KPI section highlights the total sales value. The slicer allows users to filter data dynamically, making the dashboard interactive and user-friendly. The layout is designed to maintain clarity, readability, and professional formatting standards.

Sales Performance Dashboard

- ## Skills Demonstrated

- Data Analysis using Excel
- Pivot Table Creation
- Data Visualization
- Interactive Dashboard Design
- Data Filtering using Slicers
- KPI Calculation
- Professional Report Formatting

- ## Conclusion

This project strengthened my practical understanding of Excel-based data analysis and dashboard creation. It demonstrates my ability to convert raw data into meaningful insights using visualization and structured reporting techniques.

I am continuously improving my skills in data analysis and working on more advanced Excel and analytics projects.
